## TROPICAL CYCLONE BULLETIN NR. 20

### Tropical Depression WILMA

Issued at 5:00 AM, 07 December 2025

Valid for broadcast until the next bulletin at 8:00 AM today.

#### OTHER HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

Refer to Weather Advisory No. 15 issued at 5:00 AM today for the heavy rainfall outlook due to Tropical Cyclone WILMA and Shear Line.

##### Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore the Northeast Monsoon will also bring strong to gale-force gusts over the following areas not under Wind Signal (especially in coastal and upland areas exposed to winds):

- Today: Most of Luzon, Visayas, and Zamboanga Peninsula
- Tomorrow (08 December): Most of Luzon
- Tuesday (09 December): Most of Luzon

#### HAZARDS AFFECTING COASTAL WATERS

Gale Warning is in effect over the northern and eastern seaboards of Luzon. Refer to Gale Warning No. 10 issued at 5:00 AM today.

##### 24-Hour Sea Condition Outlook

###### Up to very rough seas over the following coastal waters:

- Up to 5.0 m: The seaboards of mainland Cagayan, Isabela, and Aurora; the northern and eastern seaboards of Polillo Islands, and Camarines Norte.
- Up to 4.5 m: The eastern seaboards of Batanes and Babuyan Islands, and northern mainland Quezon; the northern and eastern seaboards of Catanduanes; the northern seaboard of Camarines Sur.
- Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.

###### Up to rough seas over the following coastal waters:

- Up to 4.0 m: The remaining seaboards of Batanes and Babuyan Islands; the seaboards of Ilocos Norte.
- Up to 3.5 m: The eastern seaboards of Albay, and Sorsogon; the seaboard of Northern Samar.
- Up to 3.0 m: The seaboards of Ilocos Sur, La Union, and Kalayaan Islands; the western seaboard of Pangasinan; the eastern seaboard of Eastern Samar.
- Mariners of small seacrafts, including all types of motorbanca, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.

###### Up to moderate to rough seas over the following coastal waters:

- Up to 2.5 m: The remaining seaboards of Pangasinan; the seaboard of Cagayancillo Islands; the eastern seaboards of Dinagat Islands, Surigao del Sur, and Davao Oriental.
- Up to 2.0 m: The western seaboards of Bataan, Batangas, Lubang Islands, Palawan, and Antique; the remaining seaboards of Quezon and Camarines Sur; the seaboards of Zambales, Romblon, Marinduque, and Cuyo Islands; the southern seaboards of Occidental Mindoro and Oriental Mindoro; the northwestern seaboard of Masbate including Burias Islands; the northern seaboard of Zamboanga del Norte.
- Mariners of motorbanca and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.

## TROPICAL CYCLONE BULLETIN NR. 20

### Tropical Depression WILMA

Issued at 5:00 AM, 07 December 2025

Valid for broadcast until the next bulletin at 8:00 AM today.

#### TRACK AND INTENSITY OUTLOOK

- It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.
- WILMA is forecast to move generally west southwestward for majority of the forecast period. On the forecast track, the center of WILMA will continue to traverse Southern Luzon and Visayas today before emerging over the Sulu Sea and passing over northern Palawan by tomorrow (08 December) morning or afternoon.
- WILMA will likely remain as a tropical depression throughout its passage over Southern Luzon and Visayas before weakening into a low pressure area over the West Philippine Sea. However, the increasingly unfavorable environment caused by the surge of the Northeast monsoon increases the possibility of an earlier weakening into a low pressure area.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 8:00 AM today.
